-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

The receipt of preliminary amendment of 01/27/2006 is acknowledged. Claims 1-14 have been canceled. Claims 15-33 have been added and are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 15-24, drawn to isolated peptide of cytotoxic T cell epitope, classified in class 530, subclass 300.
- II. Claims 15, 25-33, drawn to a composition of combinations of T cell epitope, classified in class 424, subclass 204.1. **(Please note if this group is selected further select one additional sequence beside SEQ ID NO: 36 to be examined on the merits, and amend the claims accordingly, see below for explanation)**

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I-II are mutually exclusive and patentably distinct products each are structurally and functionally different products which are made by different methods and have different uses. Moreover, the combination of T cell epitopes of Group II generates different activity. Their structures and functionalities are different. The examination of all groups would require different searches in the U.S. Patent Shoes and scientific literature and would require the consideration of different patentability issues.

Upon election of Group II Applicant is additionally required to elect one additional sequence beside sequence identification number 36 (SEQ ID NO: 36), as indicated above as they

Art Unit: 1648

apply to group(s). The products utilized are made by different methods and have different uses and delineate different results, and have different effect on interaction, antigenicity and immune response. This requirement is not to be construed as a requirement for an election of species, since each of the polypeptide or nucleic acid sequence(s) constitute an independent and patentably distinct invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
